

## New Accessories from NOVOFLEX

### Tilt bracket CB5 TILT

With the introduction of CB5 TILT, the Memmingen-based photographic think tank is once again enlarging its accessory program for ball heads. The CB5 TILT was especially designed for photographers, using the innovative ball heads CB5 or CB5II equipped with either a Q=MOUNT or Q=BASE II quick release unit.

CB5 TILT blocks the longitudinal axis of the ball head. Using a leveled tripod, horizontal panning is made easy, without having to turn the ball head upside-down. It also simplifies dynamic shooting while dragging the camera horizontally.

The resistance of vertical movement can be individually adjusted by means of the friction setting of the ball head. The CB5 TILT is ideal for panorama photography or, e.g. to follow moving subjects. Depending on which of the two locking screws is released, the ball head becomes a perfect one- or two-way tilt head and is thus suitable for photo- and video shooting alike. Three additional 1/4"-20 threads, facilitate the use of accessories such as handles, rods, goosenecks, etc.

Combining CB5 TILT with a ClassicBall 5 ball head is simple. Loosening just 2 set screws lets you insert the retaining feet into two of the three 90° notches on opposite sides, thus blocking the ball longitudinal axis. The Classic Balls unique third 90° slot for the ball neck allows for easy pan to portrait format. CB TILT will be available in two different kits, with either a Q=MOUNT or Q=BASE II quick release adapter mounted on top. These are ARCA-compatible and therefore accept NOVOFLEX Q-Plates and other third party coupling plates as well. Both quick release adapters can be offset in 90° angles, depending on how you want to use them.

The tilt bracket will be available in two different kits:

#### Set-Content:

- Tilt bracket CB5 TILT with quick-release Q=BASE II T
  - Tilt bracket CB5 TILT with quick-release Q=MOUNT T
- A allen wrench is part of every set.

#### Order Code

CB5-QB  
CB5-QM

The tilt bracket CB5 TILT is available immediately.
