

Lens adapter and tripod accessory

By launching a lens adapter and an accessory to the successful TrioPod system, the Memmingen expert for photo accessories expands his product portfolio for demanding photographers:

- The **adapter for manual EF-lenses to Micro-Four-Thirds-cameras** was especially created for photographers, who would like to use their lenses from other manufacturers on their new system cameras with MFT bayonet mount.

The adapter is solely mechanical and therefore not suitable for the original Canon EF-lenses, but only for lenses using the mechanical component of the EF-mount, like Zeiss Cine lenses, Samyang lenses or tilt-/shift and Cine lenses from Schneider-Kreuznach etc.

Of course, the new mechanical adapter is „Made in Germany“; it is produced according to highest quality standards, offer a highly-precise correction of the flange focal length and permit focusing to infinity.

The new adapter with the order code MFT/EOS is available from now on.

NOVOFLEX adapters are available for nearly every camera/lens combination. For more details please refer to the adapter finder on the NOVOFLEX-homepage www.novoflex.de.

- NOVOFLEX enlarges its TrioPod system by a **tripod support pouch** serving for weight loading and stabilization of the tripod. The pouch is simply stretched between the tripod legs and attached at the legs by means of hook-and-loop tapes. For more loading the photo bag or backpack can be placed on the pouch, which increases the tripod stability. Nice side-effect: bag or backpack stay clean in case of dirty ground.

The tripod support pouch with the order code TRIO TC is available from now on.

For more information and information on deliveries please contact: the NOVOFLEX distributor in your country, or NOVOFLEX Präzisionstechnik GmbH, Brahmstrasse 7, 87700 Memmingen, Phone 0049 -83 31- 8 88 88, Fax 0049- 83 31 - 4 71 74, E-Mail: mail@novoflex.de or in the internet under www.novoflex.de.
