

NOVOFLEX Hiking Sticks QLEG Walk III

Out and about with your camera...

For many years now the NOVOFLEX hiking sticks QLEG Walk with integrated monopod are enjoying a high reputation from nature lovers and photographers. With **QLEG Walk III** NOVOFLEX is now launching the 3rd generation of these multifunctional hiking sticks. Thus, the Memmingen specialist for accessories fulfills the demands of many customers for foldable hiking sticks.

Special emphasis has been paid in this generation to quality and stability. For this reason NOVOFLEX cooperates with the reknown Austrian manufacturer Komperdell, who makes the new hiking stick exclusively for NOVOFLEX. Only excellent, high-quality materials are used in the production process: Underneath the handle sits a 1/4"-20 stud which converts the walking stick into a monopod. Other parts consist of carbon fiber, Titanal HF and Rocksleeve, which is a highly abrasion resistant material. Further accessories are a padded hand grip, an ice-flex basket and a Wolfram-carbide tip. As optional accessory a trekking seat is available.

The new folding poles with screw connection are characterized by sections screwed tightly inside the shaft to offer best reliability and holding power!

Thus utmost safety and security are guaranteed. The Q-LEG Walk III is both compact and lightweight. Its packing dimension is only 46cm (18"), its weight 240g (0,5 lbs) plus 10g (0.35 oz) for the trekking seat. The length of the hiking stick can be individually adjusted from 120cm (47") up to max. 145cm (57"). In case that the hiking stick is used as monopod, its height without handle is 114cm (44.8").

Like the previous version, the QLEG Walk III can be used as hiking stick and/or monopod and can – in addition – become a part of the variable tripod systems TrioPod and QuadroPod. Both systems convince by their flexibility in the utilization of monopod legs. Aluminium-, carbon legs or as alternative the hiking sticks QLEG Walk II can be screwed into the tripod base of both „construction kit“ tripods. This saves a lot of weight and space, on hiking trips as well as in the carry-on luggage during your next flight.

The NOVOFLEX hiking stick QLEG Walk III will be available by the end of 2018.
