

NOVOFLEX expands its TrioPod-tripod system

Perfect alignment

Last year's launch of the NOVOFLEX tripod system TrioPod (world's first modular tripod with interchangeable legs) caused a real sensation. Photographers worldwide were enthusiastic by the possibility to fit their tripod, on a modular conception basis, to their individual needs. With the new tripod base **TrioBalance** NOVOFLEX is now enlarging the system and is offering an alternative to the standard tripod base.

The new tripod base is equipped with an integrated leveler which allows for an adjustability of 15° in all directions and which is therefore perfectly convenient for panorama photography. Moreover, this innovation facilitates a quick and precise alignment of cameras, panorama plates, ballheads etc. A non-slip locking lever makes for easy and accurate locking.

Likewise the standard base the TrioBalance, too can be equipped with diverse leg variants and each leg can be strutted apart in angles of 20°, 40°, 60° and 90°. A strut of 90° enables photo shoots on ground surface.

Like the TrioPod the TrioBalance is also available in eight different kits with carbon-fibre or aluminium legs or hiking sticks, three mini legs and a carrying bag. In addition, a kit, consisting of mini legs only, is available. For all photographers who wish to further customize their TrioPod - the single components can be purchased separately.

Thanks to the brilliant design of the TrioPod tripod system all legs and hiking sticks can be turned into a monopod within a matter of seconds. This does not only save weight, but money, too, since the purchase of an additional monopod is no longer necessary. In terms of transport, the advantages are that the legs can be separated from the tripod base. Thus, the individual parts can be stowed easily and space-savingly.

For more information and information on deliveries please contact: the NOVOFLEX distributor in your country, or NOVOFLEX Präzisionstechnik GmbH, Brahmstrasse 7, 87700 Memmingen, Phone 0049 -83 31- 8 88 88, Fax 0049- 83 31 - 4 71 74, E-Mail: mail@novoflex.de or in the internet under www.novoflex.de.
